I am recommending that a secondary ORV trail be established that runs from Tuner North to the north toward the camp that was once owned by Mr Townsend. The trail is sustainable under today's standards, is well established, been used since the 1950s and does not go to Mr Townsend's camp. It stops at a location that would provide for good tent camping, a place to hike out from, sight see from, hunt from, and explore East Henson Strand from. I have sent an attached google earth paper map to Bob DeGross showing this recommendation so please ask him for a copy of my map.
